University's of Regina students	Users/voters	LOW	High	Neutral	

STAKEHOLDER ENGAGEMENT PLAN

Project Name University's Online Voting System

Name	About the Stakeholder	How to Engage the Stakeholder
University of Regina clubs and student union	The University of Regina is an educational institution that offers a safe environment for its students and staff. The university also has many student clubs across its faculties. As well, the university has its student union.	Engaging the university is done by understanding their requests and ideas. Involve them in everything we do and inform them of what we do using email notifications. As well, university can be engaged by following their voting guidelines in our system and take into consideration their privacy concerns.
Dr. Tim Maciag	Dr. Tim Maciag is our project sponsor.	Keep him informed of our progress in the project. Using scrum meetings that are scheduled before the handing in of a project component.
Kawthar, Akash, Lakshay	Team members and the ones who are going to be implementing the software.	They are engaged in the project by working together on the project's deliverables. They communicate through WhatsApp group chat. And having regular meetings.
University's of Regina students	The university's students who are involved in the university's clubs will be the users of our system because they will be the ones to use the system for voting different positions in their clubs or student union.	They will have small engagement in the beginning phases of the project, but after the project is implemented and ready to run, they will be more engaged. We can engage them by introducing the benefits and impacts the system offer for replacing the regular physical voting process.
